

COVER LETTER

Date: December 28, 2023

Dear Hiring Manager,

I am enthusiastic to apply for the Software Developer position at Gratia Technology Pvt Ltd. As a final year B.Tech Computer Science and Engineering student at Dibrugarh University, I possess strong technical skills along with practical experience that make me an ideal candidate for this role.

During my 6-month internship at IIIANA Studio, I developed front-end UI components using React, Next.js, HTML, CSS, TailwindCSS and TypeScript. I also worked on back-end development where I built REST APIs for subscriptions, services etc. using Node.js, Nest.js and TypeScript. Through this experience, I gained hands-on exposure to the full stack development lifecycle.

In addition to my internship, I have honed my coding abilities in C++, Python, and other languages through academic projects and self-learning. I am adept at using source control with Git, project management tools like Jira, and developer platforms like GitHub and Postman. Beyond technical hard skills, I developed strong communication and collaboration skills while working with team members during my internship.

What excites me most about this role is the chance to build robust software solutions that create value for businesses. I am a quick learner excited by tough technical challenges, and I enjoy innovating solutions to complex problems. At Gratia, I hope to leverage my full-stack development experience and constantly expand my skills.

I am confident that my internship exposure, academic foundation, and passion for technology make me well-prepared for this developer position. I would be thrilled to join Gratia's agile engineering team to build innovative products that drive business success.

Thank you for your consideration. I look forward to elaborating on how my background aligns with this exciting software developer role. Feel free to contact me at kdeepjyoti311@gmail.com or (+91) 9678311183 to further discuss my qualifications.

Yours Faithfully
Deepjyoti Kalita
